22090 Pembroke Drive • Frankfort, Illinois 60423 • 815 / 212 - 4968 • kasey.warren@comcast.net

PROFILE

Results-oriented Risk Management Professional with experience in safety, health, insurance, loss control, and environmental services in the manufacturing, insurance and utility industries. Accomplished in minimizing loss of company assets, improving safety and health of employees, eliminating noncompliance, and implementing, developing, and motivating teams. Areas of expertise include:

- Business Insurance:** Proven ability to coordinate insurance renewals which increased coverage, improved service, and reduced cost.
- Risk Management:** Successful in developing strategies to audit, identify, evaluate, and recommend “best practices” to minimize exposure and comply with the law.
- Manufacturing Support:** Flexible approach to establishing risk management objectives that improve operational growth and performance without compromising safety, health, environmental or liability issues.
- Leadership:** Demonstrated success in advising, implementing, and developing individuals and teams that improve company and professional performance.

PROFESSIONAL EXPERIENCE

ACCIDENT FUND, Frankfort, IL

2004-2010

A \$750 million specialty underwriter of workers compensation coverage.

Senior Loss Prevention Consultant

Assisted over 300 insureds in various industries to develop and implement a cost effective risk management program. Managed a \$30 million book of profitable business.

- Instrumental in helping the company grow from \$30 million to \$70 million in premium in the State of Illinois by conducting pre-surveys to determine insurability and control measures needed to reduce exposures.
- Played a key role in planning, developing, and implementing the loss control program for field loss prevention consultants to use with client companies.
- Received Starfish Award from CEO for making a difference everyday.

AP CAPITAL, Chicago, IL

2001-2004

A \$260 million specialty underwriter of workers compensation and professional liability coverage.

Senior Risk Management Consultant

Responsible for assisting insureds on developing and implementing a cost effective Risk Management Program.

- Successfully reduced the Illinois Loss Ratio for AP Capital from 92% to 48%.
- Conducted pre-surveys to determine control measures needed to mitigate exposures.
- Directed insureds on recommendations to assist in their loss control, safety, and risk management efforts.

GKN SINTER METALS, Richton Park, IL

2000-2001

A \$800 million manufacturer of metal parts for the automotive, lawn and garden, and furniture industries.

Regional Safety, Health, & Environmental Manager

Accountable for developing, implementing, and managing safety, health and environmental programs at four manufacturing locations in Michigan, Illinois, and North Carolina.

- Coordinated the revision of Environmental Air Permit to meet 100% compliance with all local, state, and federal air regulations. Negotiated state regulators to eliminate over \$10,000 in fines and late penalties for previous non-compliance.
- Directed the successful completion of a Hazardous Waste Inspection with no fines.
- Successfully led risk profiling initiative to improve operational performance.

CHEROKEE SANFORD GROUP, LLC, Sanford, NC

1992-2000

A \$90 million manufacturer of bricks with an environmental services division.

Corporate Risk Manager

Accountable for developing and implementing a safety, health, and risk management program for five manufacturing plants and seven distribution centers. Additional responsibilities included purchasing corporate insurance, approving Workers Compensation claims, conducting compliance inspections for OSHA, Department of Transportation, and the Department of Labor.

- Key member of management team directly involved in growing the value of the company from \$35 million to \$82 million in 2 ½ years.
- Played a key role in reducing annual insurance cost by over \$500,000 annually by developing and implementing a risk management strategy.
- Reduced incident rate from over 25 to 10.5 by implementing a safety and health program.
- Planned and created an approved contracts/vendors program to greatly reduce third party risk.
- Built a strong network of attorneys, claims adjusters, and insurance professionals to manage risk.
- Served as primary contact for all emergency response and service agencies, such as ambulance, fire, and police.
